

Quarterly Report

Strike Resources Limited (ASX: SRK, "Strike" or "the Company") is pleased to present the Quarterly Report for the period ended 31 March 2014.

Overview

- Undertaking a strategic review of Company assets.
- Suspended operations In Peru - Lima office closed and local staff released.
- Operational overhead and costs significantly reduced.
- Holding discussions with parties interested in developing or acquiring Peru assets.
- Legal injunction against Peru concessions imposed and then quickly lifted.
- New Director appointment.
- As at 31 March 2014, the Company's cash balance stood at \$11.1 million.

ABOUT STRIKE:

Strike Resources is an ASX listed iron ore project developer, owner of the high grade Apurimac magnetite project in Peru.

Apurimac is 100% owned by Strike and has the potential to support the establishment of a significant iron ore operation, based on some of the highest magnetite grades in the world.

Alongside Apurimac, Strike holds the Cusco Iron Ore Project, and an interest in the Cerro Ccopane project, both of which are also magnetite projects in Peru.

Strike retains significant cash reserves and is presently reviewing alternative options with regard to utilisation of these funds.

Strategic Review

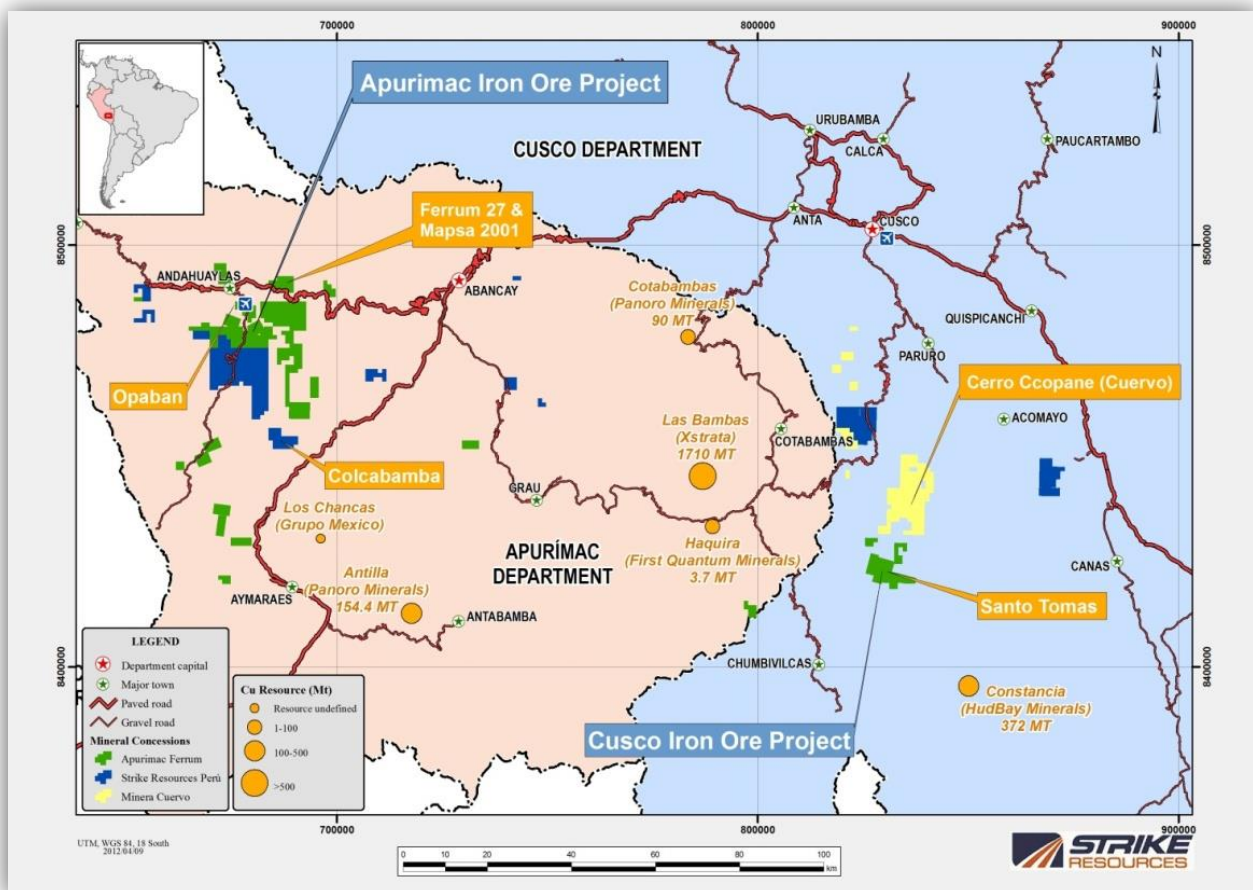

During the quarter, the Company announced that it was undertaking a strategic review of all of the Company's assets.

Whilst considerable progress had been made during 2013 in advancing relations with local communities at the flagship Apurimac project in Peru (Including exploration approvals having been received from key community groups) the Company decided that given market conditions it was not in shareholders' best interests to continue to sole fund advancement of this project.

The Company therefore decided to suspend activities on its projects in Peru and reduce operational and administrative overhead there. As part of this process, the Company has closed its office in Peru and all Peru-based employees (apart from the Managing Director) were released. Ongoing costs have been reduced to a minimum.

The Company is currently focussed on realising value for its assets in Peru and is holding discussions with a number of parties interested in participating in further development or acquisition of these assets.

Projects

Apurimac Iron Ore Project

Strike's flagship Apurimac magnetite project is one of the highest grade, large scale magnetite projects in the world and has the potential to support the establishment of a significant iron ore operation.

The exceptionally high grade 57% Fe is almost twice as high as magnetite deposits currently being developed in Australia; ore bodies are coarse grained, and soft, allowing for cheaper processing costs once in production.

A prefeasibility study completed in 2008 and updated in 2010 on the Apurimac Project indicated clear potential for development of a world class iron ore project:

- JORC Resource of 269Mt of iron ore at Apurimac of 57.3% Fe (142 Mt Indicated at 57.84% Fe and 127 Mt Inferred at 56.7% Fe).
- Mineralisation predominantly high-grade, coarse-grained magnetite providing comparatively high mass recoveries (>60%) at coarse grind size (>500 microns).
- Excellent exploration potential within current concessions with several targets containing ironstones grading >60%Fe in similar geological settings to main Opaban concessions.
- Base case of 20Mtpa of concentrate produced by open pit mining and processing 20 – 27Mtpa of ore with transport of the high grade (>66%Fe) product to the coast via a slurry pipeline for drying and shipment to customers.
- Attractive life-of-mine operating expenses (2010) of US\$ 17 – 20 per tonne of product.
- Estimated capital expenditure (2010) of US\$ 2.6 – 2.9 billion, competitive with other major iron ore projects.
- Undulating topography at project mine site.
- Consolidation opportunities.

An initial drilling program at Apurimac established 269 Mt resources of high grade, coarse grained magnetite with an average grade of 57.3% iron. Of this, potentially 67 million of Direct Shipping Ore (DSO) at an average grade of 61.5% Fe has been identified.

In early 2014 Strike demonstrated the viability of transporting this ore by truck, delivering quantities of 64% Fe ore for sale to a local steel plant on the coast of Peru.

Cusco

The Cusco project lies approximately 150km to the south - east of Apurimac and forms an attractive secondary development target for the Company in Peru.

Like Apurimac, iron ore mineralisation at the project is coarse grained and dominated by magnetite, with high grades recorded. Preliminary metallurgical tests indicate a concentrate grade of >65% Fe can be produced from this ore using conventional grinding and magnetic separation processes.

An initial inferred resource estimate of 104Mt at 32.6% Fe is recorded for the Project, which has the scope for upgrade following further exploration work (including drilling) which would support re-evaluation of the resource methodology.

No work was undertaken on the Cusco project during the quarter.

Cerro Ccopane (operated by Cuervo Resources Inc)¹

The Cerro Ccopane project, located approximately 20km to the north of the company's Cusco project and is operated by Canadian listed company Cuervo Resources Inc ("Cuervo").

On December 11, 2013 Strike announced it had issued a demand notice for C\$5,250,000 plus applicable interest to Cuervo in respect of the Investment Agreement between the two Companies, relating to the financing of the Cerro Ccopane project. The demand notice was issued following Strike's concerns regarding the solvency of Cuervo and events of default occurring under the current agreements between the companies.

Strike also issued a notice of its intention to enforce its security held over 90% of the shares of the Peruvian company holding the key assets of the project, if the full amount owed to Strike was not paid by December 16 2013. To date no further action has been undertaken.

Legal Claims

During the quarter an injunction was temporarily imposed on the Company's operations in Peru, by Peruvian company Minera Apu ("Apu"). The injunction was quickly lifted following swift intervention by Strike's lawyers. Apu, directly and indirectly, continues to pursue spurious legal claim over some of the Company's concessions in Peru. The Company continues to hold title to all its concessions in Peru and has no restrictions on its operations as a result of any claims by Apu. The Company considers the claims to be completely spurious and without merit.

Director Appointment

During the quarter the Company appointed Mr Victor Ho to the Board as a Non-Executive Director and Mr Farooq Khan as an alternate Director for Mr Ho.

Cash Position

As at 31 March 2014, the Company's cash balance stood at \$11.1 million.

¹ Strike has advanced Cuervo C\$5.25M to fund the Stage 1 drilling and exploration program and, in return, was issued warrants that can be converted to 31.5% of Cuervo's shares on an undiluted basis, at C\$0.30 per share. Strike holds a share pledge (similar to a share mortgage) over 90% of the shares in Cuervo's 100%-owned Peruvian subsidiary that, in turn, owns Cuervo's concessions. Upon Cuervo validly estimating a 500 Mt inferred resource across its Cerro Ccopane Project, this security is reduced so as to cover only 45% of those shares.

The information in respect to mineral resources and other exploration results at Cerro Ccopane is extracted from the report entitled "*Cerro Ccopane Resource and Funding Update*" released by Strike to the ASX on 30 July 2013 and available at www.strikeresources.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

JORC Code (2004) Competent Person Statement - Apurimac and Cuervo

The information in this document that relates to exploration results and mineral resources in respect of the Apurimac and Cuervo projects has been compiled by Mr Ken Hellsten, B.Sc. (Geology), who is a consultant to Strike Resources Ltd and is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Hellsten has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Mineral Resources and Ore Reserves" (the JORC Code). Mr Hellsten consents to the inclusion in this document of the matters based on this information in the form and context in which it appears.

Appendix 1 - Apurimac and Cusco mineral resources

Apurimac

The Apurimac project has a JORC resource of 269.4 Mt, consisting of:

- a 142.2 Mt Indicated Mineral Resource at 57.8% Fe; and
- a 127.2 Mt Inferred Mineral Resource at 56.7% Fe.

Combined Mineral Resources for Opaban 1 and Opaban 3

Category	Project	Density t/m ³	Mt	Fe%	SiO ₂ %	Al ₂ O ₃ %	P%	S%

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
